

FST800—901 Air Differential Pressure Transmitter

- Features
- Micro differential pressure testing
 - Small, easy to install
 - Applies to non-conductive, non-corrosive gas

Applicable Scope

- Micro differential pressure detection in boiler, wine, motorcycles, electric power and other industries compatible with silicone, non-conductive and non-corrosive gases

Project	Parameter		
Testing Range	0~1kPa	0~2.5kPa	0~7kPa
Positive & Negative Overload Pressure	3kPa	7.5kPa	21kPa
Limited Pressure	5kPa	12.5kPa	35kPa
Static Pressure	300kPa	300kPa	300kPa
Output Signal	4~20mA/15~30VDC		
Supply Voltage	15~30VDC		
Accuracy	± 1%FS		
Relative Humidity	0~80%RH		
Working Temperature	-10~+85°C		
Compensated Temperature	0~+70°C
